- 44% reduced waste by 5% or more.

About Falcon Structures: Founded in 2003, Falcon Structures repurposes steel shipping containers into AC462 compliant modules for container-based buildings and also creates single container structures for living, working and storage. In 2016, Falcon manufactured 122 modified containers that were then stacked into a stadium called Fortress Obetz, the largest shipping container structure in the United States to date.
